## Example github project

*A Data Management Plan created using DMP Assistant*

**Creator:** Emma Hudgins

**Affiliation:** Other Organisation

**Funder:** FRQNT

**Template:** Portage Template

**Grant number:** B3X

**Project abstract:**

Fitting STAN models to the mortality risk of each invasive insect pest to each tree species in the US

**Last modified:** 29-03-2021

# Example github project

---

## Data Collection

**What types of data will you collect, create, link to, acquire and/or record?**

Question not answered.

**What file formats will your data be collected in? Will these formats allow for data re-use, sharing and long-term access to the data?**

Question not answered.

**What conventions and procedures will you use to structure, name and version-control your files to help you and others better understand how your data are organized?**

Question not answered.

## Documentation and Metadata

**What documentation will be needed for the data to be read and interpreted correctly in the future?**

Question not answered.

**How will you make sure that documentation is created or captured consistently throughout your project?**

Question not answered.

**If you are using a metadata standard and/or tools to document and describe your data, please list here.**

Question not answered.

## Storage and Backup

**What are the anticipated storage requirements for your project, in terms of storage space (in megabytes, gigabytes, terabytes, etc.) and the length of time you will be storing it?**

Question not answered.

**How and where will your data be stored and backed up during your research project?**

Question not answered.

**How will the research team and other collaborators access, modify, and contribute data throughout the project?**

Question not answered.

## **Preservation**

**Where will you deposit your data for long-term preservation and access at the end of your research project?**

Question not answered.

**Indicate how you will ensure your data is preservation ready. Consider preservation-friendly file formats, ensuring file integrity, anonymization and de-identification, inclusion of supporting documentation.**

Question not answered.

## **Sharing and Reuse**

**What data will you be sharing and in what form? (e.g. raw, processed, analyzed, final).**

Question not answered.

**Have you considered what type of end-user license to include with your data?**

Question not answered.

**What steps will be taken to help the research community know that your data exists?**

Question not answered.

## **Responsibilities and Resources**

**Identify who will be responsible for managing this project's data during and after the project and the major data management tasks for which they will be responsible.**

Question not answered.

**How will responsibilities for managing data activities be handled if substantive changes happen in the personnel overseeing the project's data, including a change of Principal Investigator?**

Question not answered.

**What resources will you require to implement your data management plan? What do you estimate the overall cost for data management to be?**

Question not answered.

## **Ethics and Legal Compliance**

**If your research project includes sensitive data, how will you ensure that it is securely managed and accessible only to approved members of the project?**

Question not answered.

**If applicable, what strategies will you undertake to address secondary uses of sensitive data?**

Question not answered.

**How will you manage legal, ethical, and intellectual property issues?**

Question not answered.
